

COMMONSENSOR

For Smart Irrigation

*Allows plant autonomy - promotes maximum efficiency and economy.
THE PLANT KNOWS BEST!*

- ❖ *An autonomous computer enabling the plant to open and close the water valve to the amount and at the time the plant requires.*
- ❖ *Maximal irrigation efficiency – saving water, fertilizer and most importantly, costs.*
- ❖ *User and environment friendly – avoids contamination of water resources.*
- ❖ *Compatible with all types of plants, soils and soilless media, and irrigation technologies.*
- ❖ *The **CommonSensor** is controlled remotely by software, which can set the **CommonSensor** parameters and download accumulated data, using **Bluetooth** and **GPRS** wireless communication.*
